

DIALOCK HOTEL

THE ELECTRONIC ACCESS CONTROL SYSTEM
FOR THE HOSPITALITY INDUSTRY.

SIMPLY EASY)))

> Easy to configure.
> Easy to network.
> Easy to operate.
> Easy does it.

EASY – AS A MATTER OF PRINCIPLE.

Dialock access control system: Designed for maximum convenience. For your guests. And for you.

Dialock makes locking and unlocking amazingly easy. Using a single key card the guest can open all doors, cabinets and areas that are intended for him. And only those. A convenient and also secure experience. The reason: The credit card-sized key operates touchlessly and without wear with reliable data communication.

Dialock is easy for you as well – from planning to operation. Häfele is a pioneer in RFID technology, and an experienced partner at your side in every respect!

This is based on decades of experience in project service, engineering expertise and a close connection to the market.

Dialock is an economically sensible and future-proof investment – above all, because the system is flexible and reliable. You will learn more about the advantages of Dialock on the pages that follow. Simply discover the possibilities for your property.

Dialock with RFID

- > Pass the key card past the door or wall terminal.
- > The system receives the identification from the card by radio.
- > The terminal receives the "Access granted" signal from the system.

APPLICATIONS AND THEIR POSSIBILITIES.

Dialock access control system: From car park to shop display cabinet.
With flexible access authorisations.

You define which doors guests, the room service employees and the management are allowed to unlock. If you wish, you can also specify the day of the week and the time. Almost anything that you can lock and unlock can be controlled using Dialock. Control is central using the Dialock software. You determine the number of contact points and the user.
Block a card? The information is distributed in seconds. And Dialock also has many more possibilities.

ENERGY MANAGEMENT

CHECK-IN

The personal access profile of the guest is associated with the key card during check-in. Reservations can be changed and services ordered at any time, without having to issue a new key.

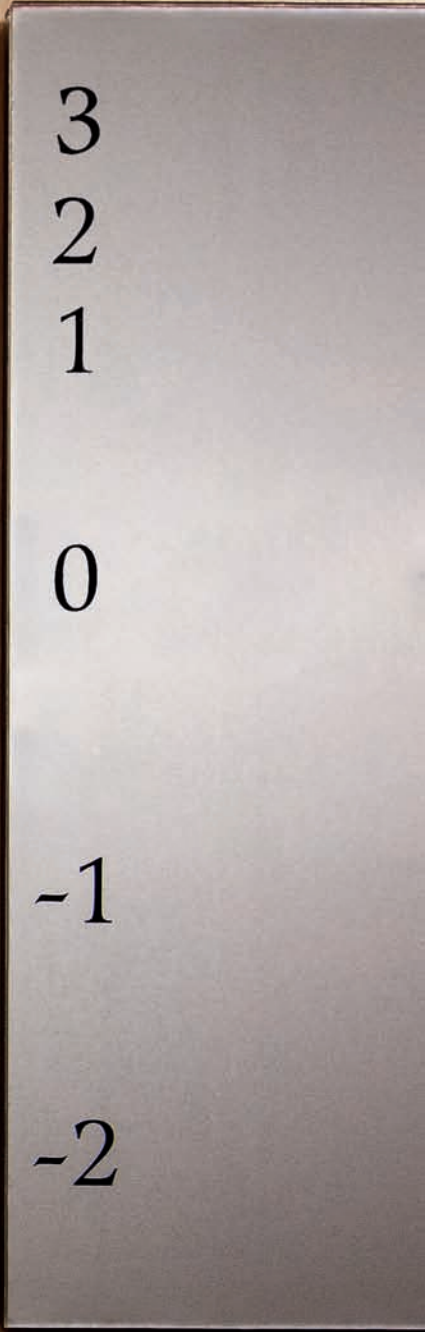

PARKING

Weather-proof reader units in external areas also make access to the parking areas secure and control barriers, roller shutters and security cameras.

MAIN ENTRANCE

Dialock is the secure solution for identification from the main entrance to the car park barrier and the coffee machine. With a single card.

LIFT

Access to the floors can be controlled using the key card. This provides convenience and additional security.

ROOM DOOR

Dialock locks and unlocks all kinds of doors. And also activates functions in the room such as welcoming atmospheric light.

WELLNESS

Dialock controls turnstiles at the entrance, locker doors in the changing area and provides a connection for cashless payment at the bar or the drinks machine.

10 / DIALOCK IN THE HOTEL

ACCESS CONTROL SYSTEM LIKE A TAILOR-MADE SUIT.

Building size, role models, interfaces, technology, security.
Dialock adapts itself.

Dialock does not just adapt itself to the size of your hotel. It also determines the scope of functionality. Completely in accordance with your convenience and security requirements. The simple role model for managing groups of persons, employees and guests can be just as individually adapted as online or offline control. Through to interfaces for building services or billing systems in the wellness area or the hotel bar, and much more. Dialock is every bit as good as a tailor-made suit.

CENTRAL CONTROL. NETWORKED OPERATION.

Dialock combines systems and components.

MANAGEMENT
SOFTWARE

BUILDING SERVICES

Dialock also saves energy. The temperature of a hotel room can be lowered if the guest is not in the room, for example. The open interface design and connection to all types of popular hotel management software allow Dialock to be used in combination with time and attendance systems, billing systems or building services.

Dialock also connects the different systems that are networked with terminals. You can create different security levels and reduce your procurement costs by combining online, offline and wireless terminals.

dialock

TIME AND ATTENDANCE

The main focus is on contact with the guest during check-in, not operating the software. Dialock is therefore controlled in the background by the customary hotel management system. The procedures at reception remain smooth and quick as usual. Operation of the Dialock software is easy and clear due to dialogue-oriented entry.

Dialock assists you intuitively when issuing keys, changing rooms, booking wellness services, billing in the restaurant and checking out, and even looks after management information.

EASY COMMUNICATION. INTUITIVE OPERATION.

Dialock: Makes procedures easier. For guests, employees and management.

“

I would like a room.

”

FUTURE-PROOF INVESTMENT.

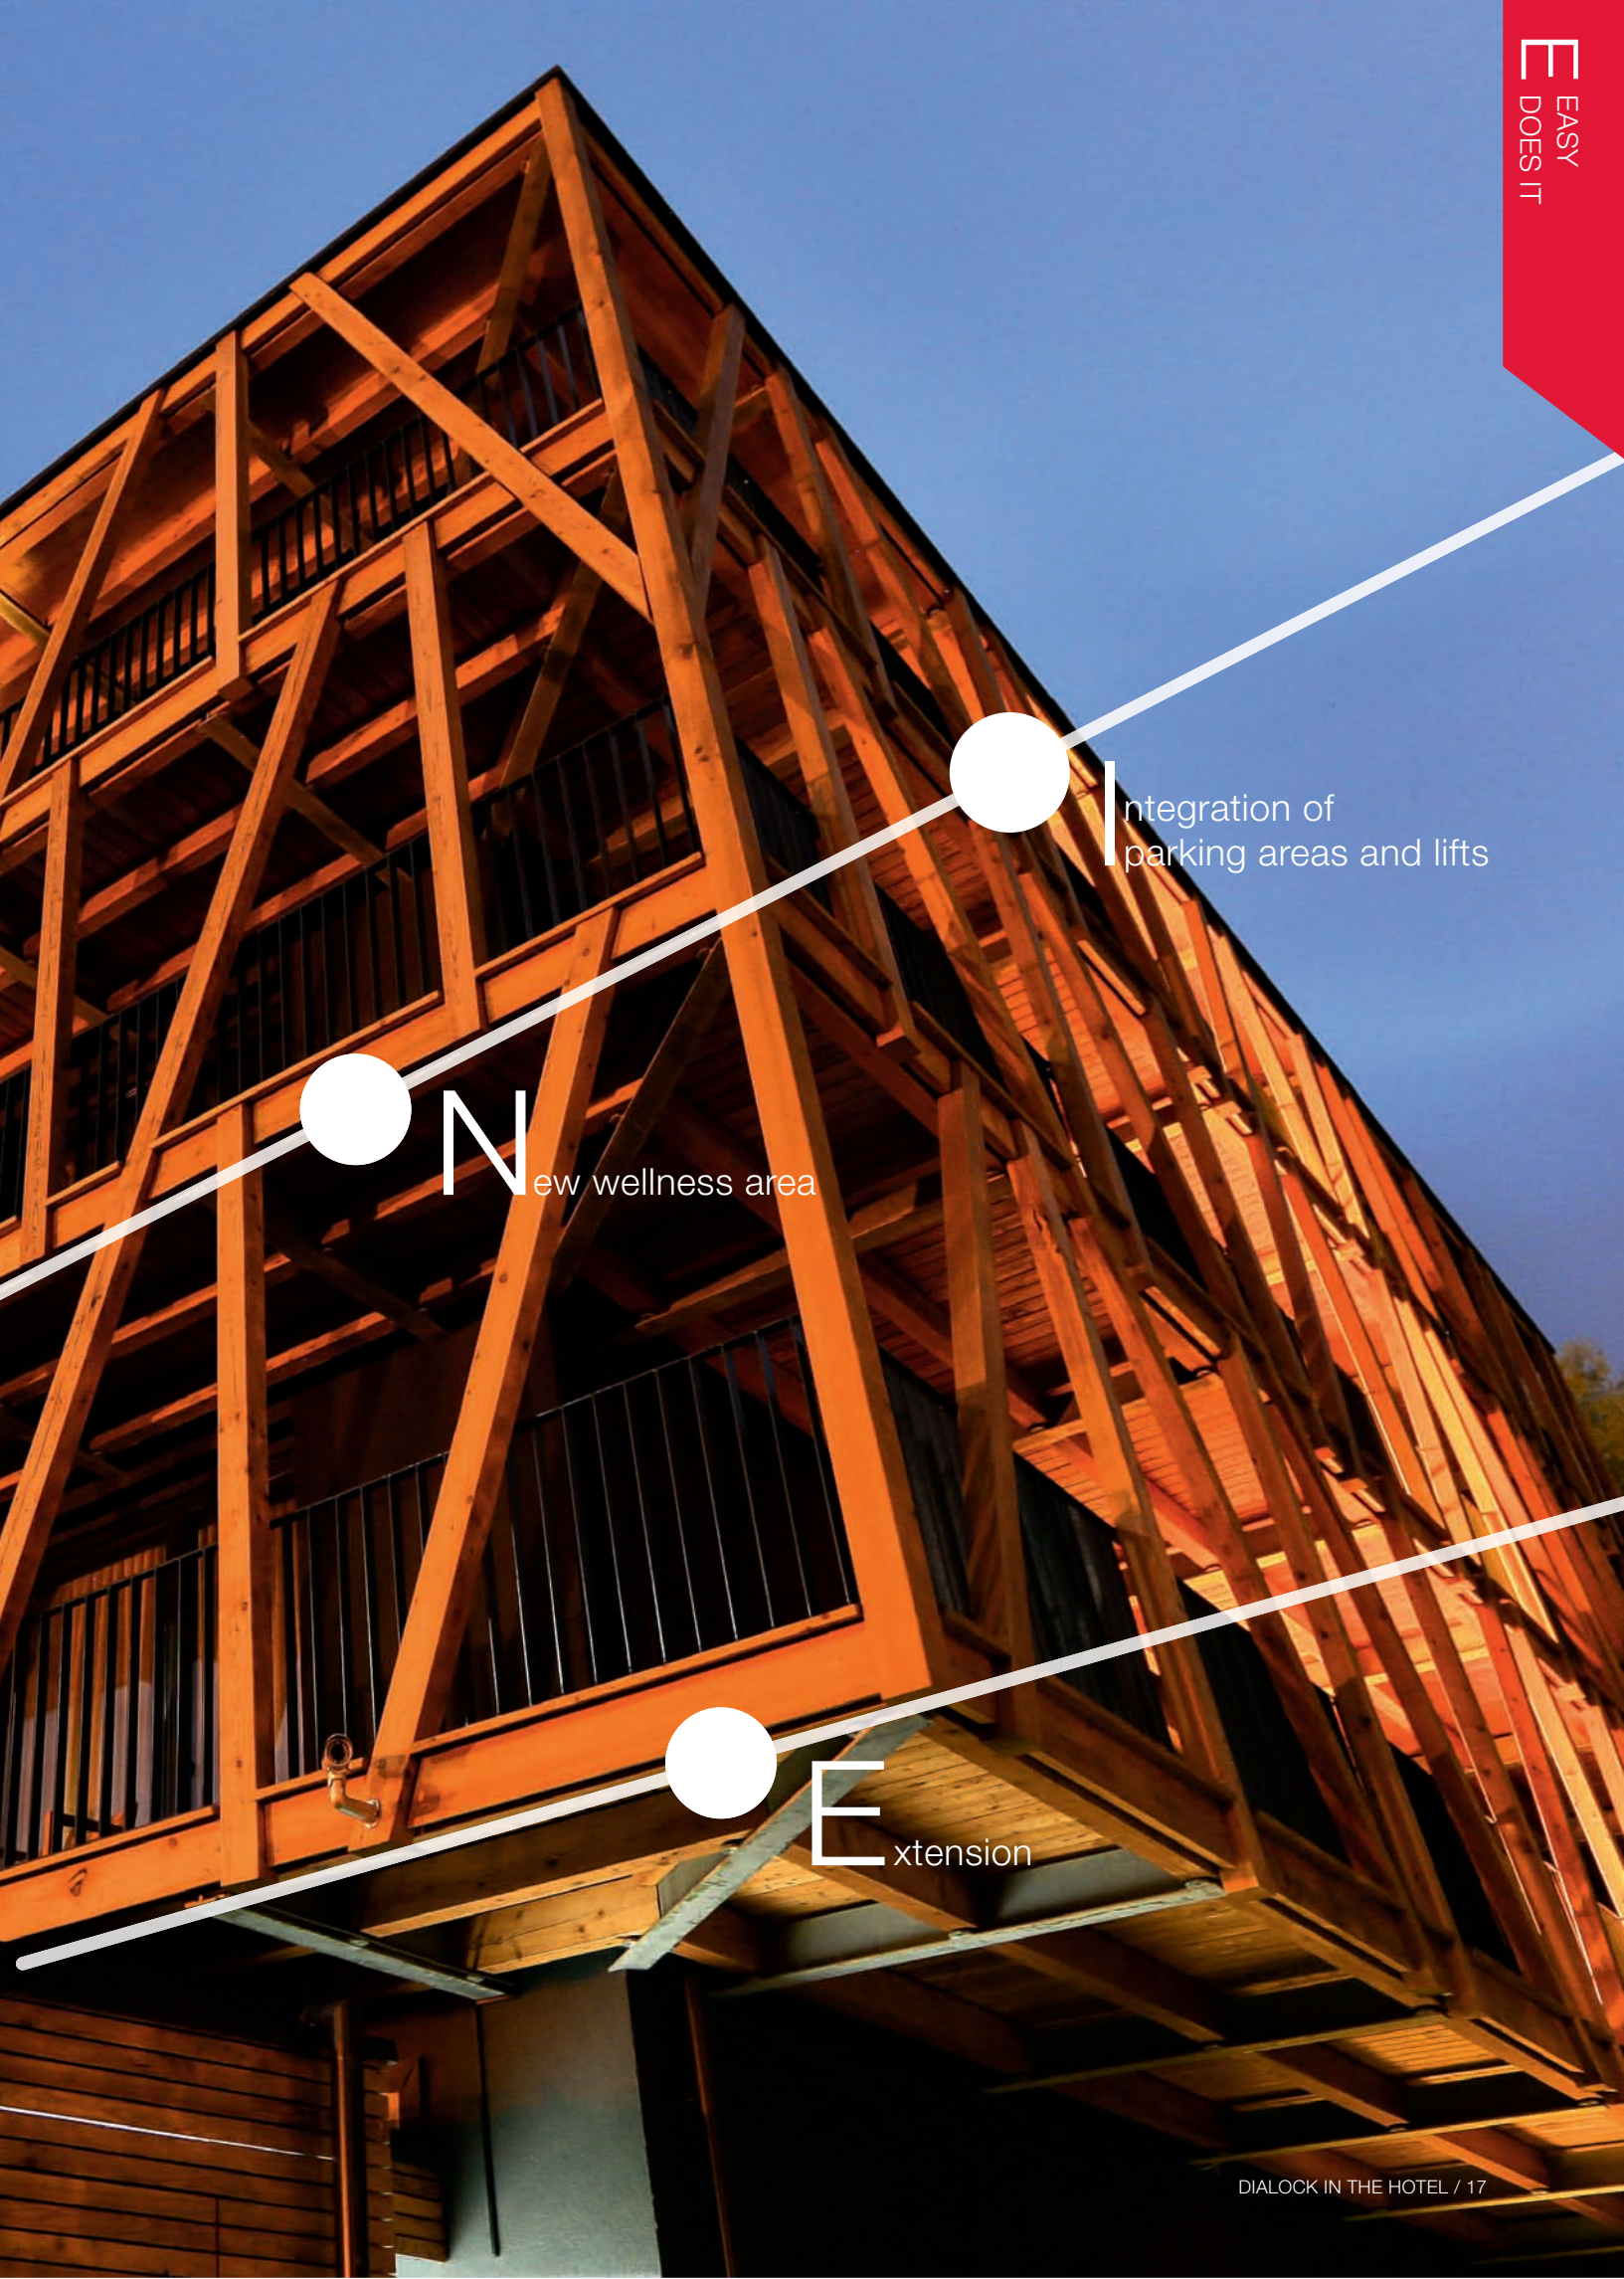

Dialock. Possible at any time: conversion, extension and development.

Your start with Dialock: new extension with reception and main entrance. Later you equip the main building with Dialock and connect the billing system for the bar and restaurant. And after the next growth spurt, the parking areas, the wellness area and the lifts are also added – with access for non-hotel personnel.

Dialock makes modular investments possible. Because the system can be extended at any time. Cost-effective advantage: Conversions with Dialock do not interrupt ongoing operations. Future-proof in every respect.

SECURITY REQUIRES KNOWLEDGE AND RELIABILITY.

Dialock access control system:
Professional service during planning and operation.

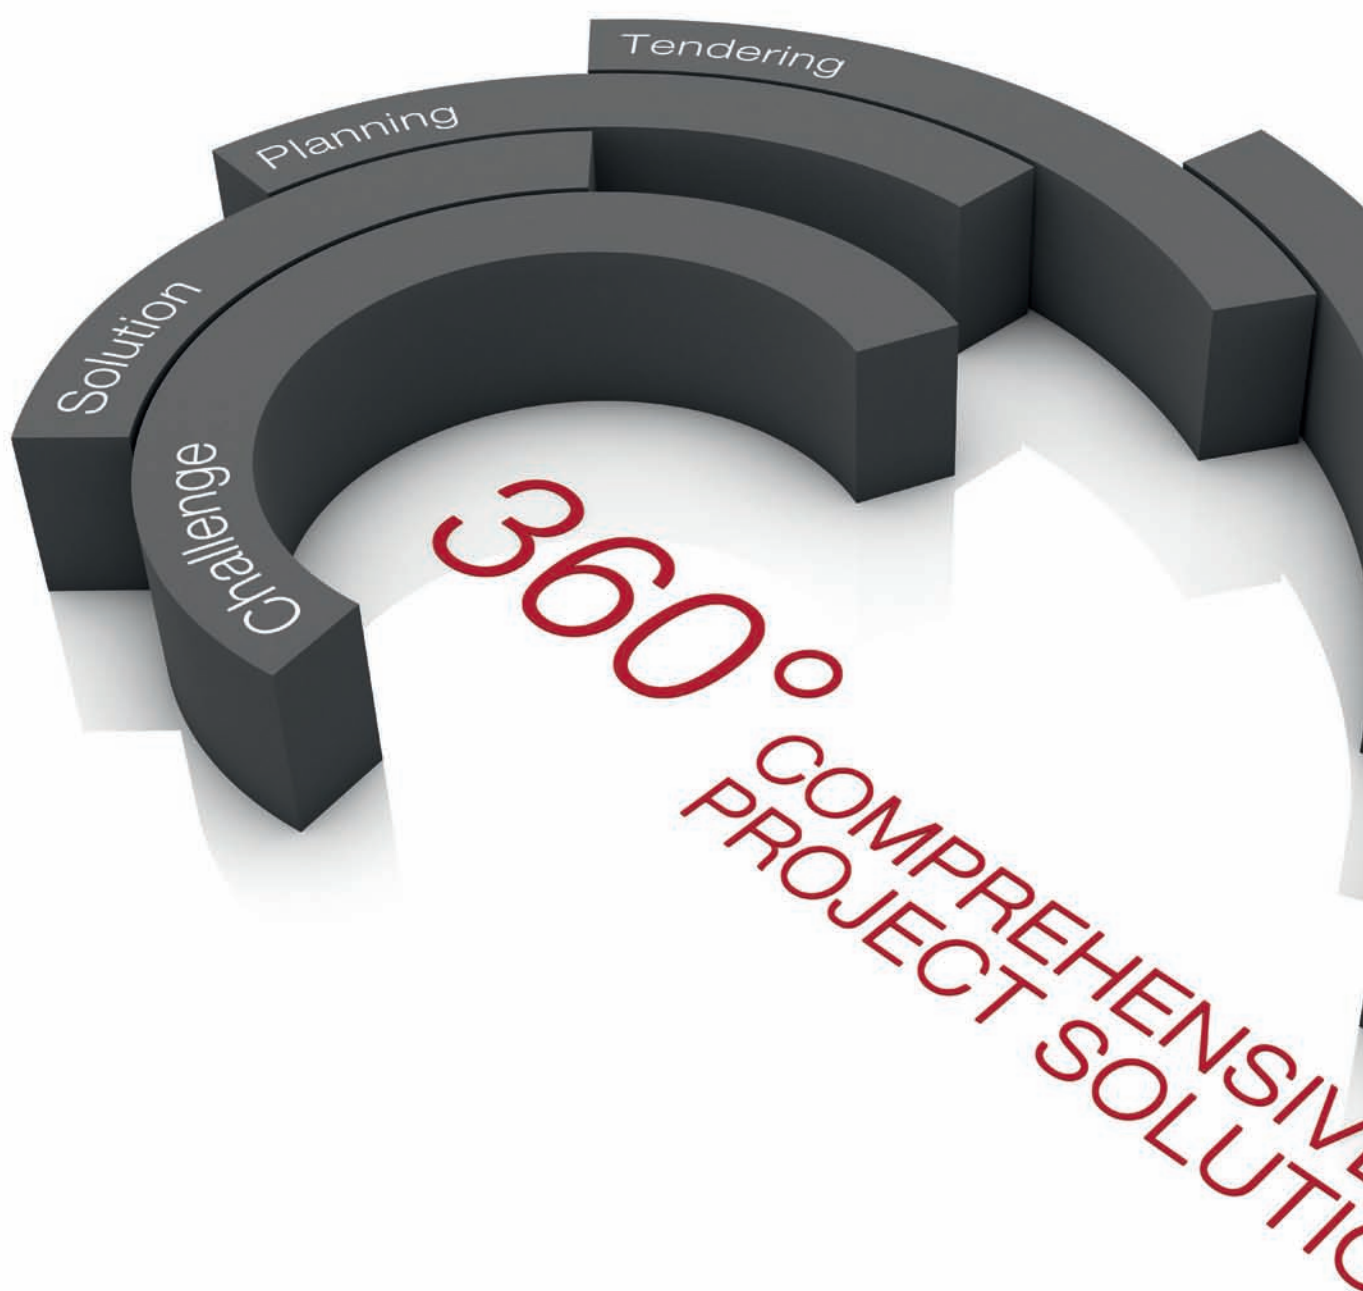

Service

The easiness of Dialock is shown in the entire planning process. Right from the start, you receive comprehensive support, also beyond technical matters. The implementation of the system is carried out in such a way that current operation is affected as little as possible.

However, disturbance-free day-to-day operation is what is important. This is why Häfele and its specialists are not just available to you at all times but via remote maintenance if required, or even in person on site. At all times. Because for you Dialock means "Easy does it".

HÄFELE – THE RELIABLE PARTNER IN THE HOTEL.

For operators, investors and planners.

System expertise projects

In anything to do with the development of projects, Häfele assists you with a unique service, whose mainstay is manufacturer-independent advice. Many employees in the project area advise planners, architects and builders in the implementation of their ideas. The basis for this is industrial expertise.

The company founded in 1923 by Adolf Häfele is now one of the leading international specialists for furniture fittings and architectural hardware as well as electronic access control systems. More than 6,600 employees look after about 160,000 customers all over the world. The proximity to the market and the customers was and still is an innovative driver for Häfele.

FUNCTIONAL FURNITURE SOLUTIONS.

“Making better use of small rooms” is the guiding principle of this programme. The intelligent concepts and furniture solutions impress with their outstanding functionality.

Extend sensibly.

Häfele assists you as a competent partner for the entire project with a wide range of products that are suitable for hotels.

SAFES

In addition to Dialock, Häfele has a range of supplementary assortments. Also for protecting valuables.

MINI BAR

All from one source. Häfele also has different solutions in its product range for the mini bar.

FUNCTIONAL FURNITURE SOLUTIONS

The elegant possibility of making display screens disappear in furniture also comes under this heading.

MOBILE PARTITIONS

Large, open rooms can be converted into several small rooms. Häfele has the suitable fittings for this.

LIGHTING

From light source to controller, Häfele supplies the entire product range for illuminating furniture and rooms. For even better ambience.

DOOR PLANNING

Häfele provides complete door solutions from a single source. Door frame, door leaf, finish and fittings as one tested unit. Individual, in accordance with your requirements.

TRUST IS AN INCENTIVE.

Selected reference projects.

If you are not yet convinced by Dialock, just ask your colleagues. Dialock has been in use for years in some of these properties. And it has developed organically together with the properties in some cases. Ask about the reliability of the system and the Häfele service. And make your property our next reference project with Dialock.
